Drs. David and Stephen Chenin
10730 S. Eastern Avenue. Ste 100
Henderson, NV 89052

Dear Drs. Chenin,

Would you please thank your family, staff and patients for all the wonderful things they did for and her seven children.

This woman is a loving wonderful woman who took in two unwanted foster children even though she was a single parent with five children of her own. If anyone deserved help she did, but what you all did surpassed anything that she could have possibly dreamed of.

She has not stopped talking about the Christmas tree, decorations, gifts, food, furniture and money that you gave her. She said that the way you all came into her home, accompanied by your children, and put up a Christmas Tree and decorations, tidied her cupboards and put away the food, wrapped Christmas presents and put them all around the tree, even making up the beds and arranging the furniture, she said you were like Santa's elves turning her home into a paradise. She talks often of the joy of her children on Christmas morning, and how she had worried that the children would not have a Christmas at all. Instead they had one that they'll remember all their days.

I would like to add that today I visited the children's school and learned that their grades have really improved over the last few weeks, and I am sure that much of it is because of the happiness that you brought them.

Thank you again for bringing so much happiness to this family.

Yours Truly,

Lorraine D. Kubacki / CASA
