## SECTION I—HISTORY OF THE CONCEPT

Chapter 1	<b>The Dental Contour Appliance: A Historical Review</b>	<b>3</b>
	<i>Henry I. Nahoum</i>	
Chapter 2	<b>Essix Technology: Tooth Movement and Retention</b>	<b>11</b>
	<i>John Sheridan</i>	
Chapter 3	<b>History and Overview of the Invisalign System</b>	<b>25</b>
	<i>Trang Duong</i>	

## SECTION II—MODELING IN THE INVISALIGN SYSTEM

Chapter 4	<b>Polyvinyl Siloxane Impression Materials</b>	<b>35</b>
	<i>John M. Powers</i>	
Chapter 5	<b>Align's Standard on Quality Impressions</b>	<b>43</b>
	<i>David Chenin</i>	
Chapter 6	<b>Scanning Process and Stereolithography</b>	<b>47</b>
	<i>Srinivas Kaza</i>	
Chapter 7	<b>Invisalign Software</b>	<b>55</b>
	<i>Andrew Beers</i>	
Chapter 8	<b>Virtual Diagnostic Setup</b>	<b>67</b>
	<i>David Chenin and Kent Verdis</i>	
Chapter 9	<b>Attachments</b>	<b>77</b>
	<i>Peter Knopp and Mitra G. Derakhshan</i>	
Chapter 10	<b>Invisalign Attachments: Materials</b>	<b>91</b>
	<i>Eric Kuo and Trang Duong</i>	

- Chapter 11**    **ClinCheck: Overview and Preparation**    **99**  
*Craig Crawford*
- Chapter 12**    **Staging**    **105**  
*Rene Sterental*
- Chapter 13**    **Overcorrection: Principles and Considerations**    **115**  
*Eric Kuo*
- Chapter 14**    **Three-Dimensional Superimposition Tool**    **121**  
*C. Van Nguyen and Jihua Cheng*
- Chapter 15**    **Virtual Invisalign Practice**    **133**  
*David Chenin*
- Chapter 16**    **Computer-Oriented Dental Measurements**    **137**  
*Vadim Matov*

### **SECTION III—PERFORMANCE CHARACTERISTICS OF THE INVISALIGN SYSTEM**

- Chapter 17**    **Mechanics of Tooth Movement with Invisalign**    **149**  
*Andrew Beers and Trang Duong*
- Chapter 18**    **Applications of Mechanics with Invisalign**    **153**  
*Heng Cao and Trang Duong*
- Chapter 19**    **Biologic Elements of Tooth Movement**    **163**  
*Orhan C. Tuncay*
- Chapter 20**    **Properties of Aligner Material Ex30**    **177**  
*Robert Tricca and Chunha Li*
- Chapter 21**    **Ex40 Material and Aligner Thickness**    **187**  
*Trang Duong, Eric Kuo, and Mitra G. Derakhshan*
- Chapter 22**    **Extraction Treatment with Invisalign**    **195**  
*David E. Paquette*
- Chapter 23**    **Force Application with Invisalign: Constancy and Compliance**    **207**  
*Trang Duong and Robert Tricca*

## SECTION IV—CLINICAL CONSIDERATIONS IN USING THE INVISALIGN SYSTEM

- Chapter 24**    **Advantages of the Invisalign System**    **215**  
*Trang Duong and Mitra G. Derakhshan*
- Chapter 25**    **Review of the Diagnostic Process**    **223**  
*Robert L. Boyd*
- Chapter 26**    **Interproximal Enamel Reduction**    **255**  
*Rainer-Reginald Miethke and Paul-Georg Jost-Brinkmann*
- Chapter 27**    **Facial Esthetic Examination and Analysis**    **271**  
*Marc B. Ackerman*
- Chapter 28**    **Surgical Treatment and Invisalign**    **283**  
*Ross Miller and Trang Duong*
- Chapter 29**    **Feasibility Study of the Invisalign System in Treatment of Adolescents**    **293**  
*Andrew Trosien and Robert Fry*
- Chapter 30**    **Data Mining: Principles and Considerations**    **301**  
*Eric Kuo*

## SECTION V—OFFICE DESIGN AND TECHNOLOGY

- Chapter 31**    **Invisalign Office Design and Technology**    **309**  
*Orhan C. Tuncay, Marc S. Lemchen, and Agnes A. Kan*

# Preface

The long-awaited paradigm shift in orthodontics arrived with the introduction of the Invisalign System. This unique treatment approach has been instrumental in removing the ever-present shroud of mystery surrounding orthodontics by allowing both dental practitioner and patient to develop a visual understanding of orthodontic tooth movement. In this way, it has founded a culture of true and attainable visual treatment objectives. Moreover, the esthetic and practical advantages of the system have extended orthodontic services to a greater population.

The Invisalign System is multilingual. Its spoken languages are image acquisition, software (ClinCheck), and the Invisalign aligner. The dialects are the generation of forces, attachment designs, and response of periodontal tissues to the forces generated by the aligner. The regional accents were born through the various applications of ClinCheck, spectrum of cases treated, attachment preferences, and instructions to patients. The adoption of the Invisalign System into a practice, however, is a language unto itself. It has its roots in two different tongues: biology and technology. To be fluent in all of these languages and dialects, the clinician must know the root of the language and how the dialects have been derived.

This book, the first to be written about the Invisalign System, was compiled as an educational tool for all of the languages, dialects, and accents spoken in the world of Invisalign. It is not a how-to manual. Instead, it is designed to expose the clinician to behind-the-scene elements of customization that underlie the production of Invisalign aligners. Equipped with such information, the clinician will better understand the nature of tooth movement with the Invisalign System.

Our deepest gratitude goes to the authors from Align Technology. These individuals took precious time from their daily schedules to write about the inner workings of their operation. The Invisalign System is primarily company driven; therefore, it is their contribution that makes this textbook possible. In particular, Dr Trang Duong's indefatigability in collecting chapters from Align Technology authors is greatly appreciated. We gratefully acknowledge the monumental commitment of Align Technology, through the leadership of Amir Abolfathi, to this project. Finally, we thank Jonathan S. Simmons, whose efforts in the editing, organization, and overall preparation of the manuscript have been invaluable.

# Contributors

**Marc B. Ackerman, DMD**

Associate Professor  
Department of Orthodontics  
School of Dentistry  
Temple University  
Philadelphia, Pennsylvania

**Andrew Beers, PhD**

Director of Engineering Systems  
Align Technology, Inc

**Robert L. Boyd, DDS**

Professor and Chairman  
Department of Orthodontics  
School of Dentistry  
University of the Pacific  
San Francisco, California

**Heng Cao, PhD**

Research and Development Engineer  
Align Technology, Inc

**Jihua Cheng, PhD**

Algorithm Specialist  
Align Technology, Inc

**David Chenin, DDS**

Resident Orthodontist  
Department of Orthodontics  
School of Dentistry  
University of the Pacific  
San Francisco, California

**Craig Crawford, DDS**

Orthodontist  
Align Technology, Inc

**Mitra G. Derakhshan, DDS**

Clinical Manager of European  
Operations  
Align Technology, Inc

**Trang Duong, DDS**

Senior Staff Orthodontist  
Align Technology, Inc

**Robert Fry, DDS**

Private Practice in Orthodontics  
Olathe, Kansas

**Paul-Georg Jost-Brinkmann,  
Prof Dr Med Dent**

Senior Lecturer  
Department of Dentofacial  
Orthopedics and Orthodontics  
University Hospital Charité  
Humboldt University of Berlin  
Berlin, Germany

**Agnes A. Kan**

Architect  
Philadelphia, Pennsylvania

**Srinivas Kaza**

Product Engineer  
Align Technology, Inc

**Peter Knopp**

Senior Manager and Product  
Engineer  
Align Technology, Inc

**Eric Kuo, DDS**

Director of Product Development  
Align Technology, Inc

**Marc S. Lemchen, DMD**

Private Practice in Orthodontics  
New York, New York

**Chunha Li, PhD**

Manager of Materials Research  
Align Technology, Inc

**Vadim Matov, PhD**

Senior Algorithm Specialist  
Align Technology, Inc

**Rainer-Reginald Miethke,  
Prof Dr Med Dent**

Professor and Chairman  
Department of Dentofacial  
Orthopedics and Orthodontics  
University Hospital Charité  
Humboldt University of Berlin  
Berlin, Germany

**Ross Miller, DDS**

Private Practice in Orthodontics  
Sunnyvale, California

**Henry I. Nahoum, DDS**

Professor  
Department of Orthodontics  
School of Dentistry  
Loma Linda University  
Loma Linda, California

**C. Van Nguyen, DDS**

Private Practice in Orthodontics  
Houston, Texas

**David E. Paquette, DDS**

Private Practice in Orthodontics  
Charlotte, North Carolina

**John M. Powers, PhD**

Professor of Oral Biomaterials  
Director, Houston Biomaterials  
Research Center  
University of Texas Dental Branch at  
Houston  
Houston, Texas

**John Sheridan, DDS**  
Professor  
School of Dentistry  
Louisiana State University Health  
Sciences Center  
Baton Rouge, Louisiana

Associate Professor  
Department of Orthodontics  
Jacksonville University  
Jacksonville, Florida

**Rene Sterental, DDS**  
Staff Orthodontist  
Align Technology, Inc

**Robert Tricca, PhD**  
Director of Product Development  
Align Technology, Inc

**Andrew Trosien, DDS**  
Consulting Orthodontist  
Align Technology, Inc

**Orhan C. Tuncay, DMD**  
Professor and Chairman  
Department of Orthodontics  
School of Dentistry  
Temple University  
Philadelphia, Pennsylvania

**Kent Verdis**  
Manufacturing Process Engineer  
Align Technology, Inc

Figs 25-24 to 25-28 Patient 7.

**FIG 25-24 (a to l)** This 46-year-old patient desired to have the moderate maxillary and mandibular crowding corrected specifically with Invisalign. She had previously declined a four-premolar-extraction treatment by another orthodontist. Mild protrusion was present, but the patient was satisfied with her facial appearance, and her lips were competent. She had a Class I posterior occlusion with anterior crossbite of both maxillary lateral incisors. The maxillary right canine had significant loss of clinical crown length as a result of previous periodontal disease. At initial presentation, she was in periodontal maintenance and had not lost additional bone in 4 years.

**FIG 25-25** ClinCheck images (*a to e*, preoperative; *f to j*, treatment goal) suggested a possible outcome with expansion and IPR.

**FIG 25-26 (a to c)** Note the traditional use of midline elastics. Midlines were corrected by asymmetric Class II and Class III elastics attached to the teeth on clear buttons.
