invisalign teen

INVISALIGN TEEN

Using advanced technology, Invisalign® aligners move your teeth to create the dazzling smile that you have been waiting for. This alternative to braces consists of a series of aligners that you switch out about every 2-3 weeks. Each aligner is individually manufactured with exact calculations to gradually shift your teeth into place. Since your Invisalign system is custom-made for your teeth (*with a plan devised by you and your team*) you know you'll end up with a smile that truly fits. It is customized, removable, comfortable, cosmetic, and effective. Recently, Chenin Orthodontics became the first provider of Invisalign Teen® in Nevada. We are proud to offer teenage patients this advanced and unique orthodontic treatment option. Invisalign Teen has all of the wonderful technology of Invisalign for adults, with added features specifically designed for teenagers. Although there are many choices out there, no other method works as effortlessly as the Invisalign system. Invisalign is the best way to transform your smile without interfering with your day-to-day life. ▲

topDENTISTS AS SEEN IN:

About topDENTISTS™

topDENTISTS was launched in January 2007 with the intent to identify the best dentists and specialists in the country and is the only list of its kind, chosen by the dental profession themselves.

Finding the right dentist can be an overwhelming process. Where do you start? Asking your doctor or your friends can be helpful. Other options such as referral services can often require dentists to pay for their listings and any dentist can pay for an ad in the yellow pages. Here at topDENTISTS it is our mission to help you find the right dentist for your needs.

Our lists have reached the readers of magazines from New Hampshire to Honolulu and from Minnesota to Tampa. With a circulation of over 1 million and reaching nearly 10 million readers nationally, topDENTISTS is quickly becoming the most recognizable list of dentists in the United States.

“If you had a patient in need of a dentist, which dentist would you refer them to?”

This is the question we’ve asked thousands of dentists to help us determine who the topDentists should be. Dentists and specialists are asked to take into consideration years of experience, continuing education, manner with patients, use of new techniques and technologies and of course physical results.

The nomination pool of dentists consists of dentists listed online with the American Dental Association (<http://www.ada.org>), as well as dentists listed online with their local dental societies, thus allowing virtually every dentist the opportunity to participate. Dentists are also given the opportunity to nominate other dentists who we have missed that they feel should be included in our list. Respondents are asked to put aside any personal bias or political motivations and to use only their knowledge of their peer’s work when evaluating the other nominees.

Voters are asked to individually evaluate the practitioners

on their ballot whose work they are familiar with. Once the balloting is completed, the scores are compiled and then averaged. The numerical average required for inclusion varies depending on the average for all the nominees within the specialty and the geographic area. Borderline cases are given careful consideration by the editors. Voting characteristics and comments are taken into consideration while making decisions. Past awards a dentist has received and status in various dental academies can play a factor in our decision.

Once the decisions have been finalized, the included dentists are checked against state dental boards for disciplinary actions to make sure they have an active license and are in good standing with the board. Of course there are many fine dentists who are not included in this representative list. It is intended as a sampling of the great body of talent in the field of dentistry in Nevada. A dentist’s inclusion on our list is based on the subjective judgments of his or her fellow dentists. ▲
